

INK PROCESSOR

- 1) Adjustable mixing blade
- 2) Self-centering locking system
- 3) Control panel
- 4) Power
- 5) Reversible mixing direction
- 6) Variable speed control
- 7) Handle for transit

MHM Ink Processor offers a new dimension in value for those mixing ink bases with pigments or blending colours for matches. The high tork motor has variable speed and direction to ensure a complete mix of viscose inks. All the features are included as standard that you may have to pay extra for on competitors units, at a price that will win hands down

Specifications:

- 220 volt, single phase, 50/60Hz, 0.2 amps
- Speed control range: 0-35 RPM
- Easy change mixing blade
- Mixing container range: 5 – 22 liters (1-5 Gallon)
- Suitable for High Density Inks
- AC frequency conversion speed control
- Ideal for viscose liquids
- Self-centering clamping feature
