

Squeegees & Floodbars

Squeegees and floodbars are available in a wide range of sizes for all **MHM Screen Printing Machines**.

Our unique squeegee profile (with no bolts across the front surface) allows for rapid changing of the rubber blades and ensures even clamping of the rubber with zero distortion, not to mention effortless cleaning.

MHM floodbars are produced from stainless steel, a much harder material than aluminium, greatly reducing the chances of 'edge damage' during the cleaning

FEATURES:

- Compatible with all MHM machines
- Unique squeegee profile for rapid blade changing, zero distortion and effortless cleaning
- High quality stainless steel floodbars for improved durability
- Available in a wide range of sizes for all MHM machines
- Squeegee rubber available in a variety of profiles and different shore hardness
- Special sizes available upon request

Aluminium Honeycomb Pallets

Aluminium honeycomb pallets (with or without neck profile) are available in a variety of styles and sizes for all **MHM Screen Printing Machines**.

Constructed from aerospace quality high-tech aluminium honeycomb material, these pallets are extremely durable, yet **conveniently lightweight** for operator handling. The construction process ensures these pallets are incredibly flat, essential for print repeatability on today's **modern Screen Printing Machines**.

FEATURES:

- Constructed from aerospace quality high-tech aluminium honeycomb material
- Extremely durable yet conveniently lightweight for operator handling.
- ‚True‘ flat surface for improved accuracy and print repeatability.
- Complete with mounting brackets to work in conjunction with the ‚Automatic push button pallet change‘ feature, standard on all MHM machines.
- Available with or without neck profile in a variety of styles and sizes
- Specialist pallets available including ‚all-over print‘, jacket hold down, single sleeve, sock, umbrella and vacuum
